The Yellow River. The Yellow River has been a constant source of ar rives dread to the Chinese, from the earliest days of their history. Desiring an immense truck of country, restrained within its channel by artiinto which great quantities of gold had been care ficial embankments which it has periodically ried and there deposited prior to their being to burst, it has been regarded by them with almost equal tenr and veneration. To foreigners, the changes in its course and their causes have been a constant source of mystery. Most writers have been content to recognise its existence, or to indicate raguely the district through which it flows : and to the present day, we rely mainly on native being many, thousand feet long, costing lamense report for the belief that the embouchure indicated their completion. But not with trading their cost.

A few months ago, two interesting papers were these enterprises generally prove lucrative, and read before the Asiatic Society by Messas Mar-So successful have they been of late, that those tin and Williamson, which appeared to the w underway will be everywhere pushed with energy. some light on the subject. The observations of the latter confirmed an impression which had while many new ones will be undertaken the previously prevailed, that the main stream now. dicharged itself to the north, instead of the year has been propitious to hydraulic mining, south, of the Sauntung promontary -into the Mr. Marin corrobarated this statement, and explained further that the alteration in channel, to The diggings into which this process is introduced a northerly from the previous southerly course. with best effect are generally deep—sometimes a bundled feet or more, and hence are apt to list and Shartong provinces. But native reports. for a long time. The mass of the dirt washed by which have lately conched us, tend to envelope

mining where good incilities exist for carrying it campletely abandoned the province of Kinngsu, and the work of many men, and remercing profitable hundred kegs being often used at a charge—is found another efficient ally and labor-saving agent in this class of mining. Latterly, also, stown has here the propensity of native reports to devabeen brought into requisition, in a few cases, for raising water for hydraulic washing where it could not otherwise be obtained. Preparations for river-had mining are bring made at a number of forms, whose wonds reach us. Hut even in the most, wild, a foundation of fact is always discernible. The very superstition in reinto a flume, by bara its bed which is then workad by means of sluices; or at least such possions. "finger-bane," existed, though the belief in its of it as may be found to pay. These operations have herotofore so often proved failures that they have come to be left mostly to be carried on by the Chinese who are not as the content of the first and the court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence of the first court of the first sound occurrence occurrence of the first sound occurrence occurre the Chinese, who are content to work for smaller is attributable to the Yellow River, as the Chinese wages, or perhaps take greater changes than the say, or to an overflow of the lakes which cover Christ, between Chinking and Alwai-agan.

wages, and with an ample supply of water while some have even reached bhanghai, and heen would give profitable employment to many recommended by Ilis, Excellency to the charity of So compelialy isolated are we from the people three who may each to work them. In course are concerned the fact that discoveries made when the concerned the fact discoveries made when the concerned that many take an interest in the country, its conformation and resources, who care ging the probable area of our placer mines, us well as the various improvements made in the mother than the full of interest. It raises a diable whether the auxiliarum and the reaching and manipulating the characterist. It raises a diable whether the auriferous earth, and in brist, by reason ut the bealthful condition and encouraging aspect of the business generally, this branch of mining is begin. ] re-neceptation of the hed of the Tre-teing, were not ning to enjoy the confidence of all classes, being only a part al return to its former channel. We regarded by the labouring man and capitalian alike wood r much that the desire for change and sport with favor. Money is being freely ambasked not which, every autumun, leads travellers through only in the purchase of claims—fur some of which the wel-known greeks in the southern portion of this province, and even souther of into Chekesne. in the erect on of mills, the construction of tun | do: s not longed them to explore the comparatively nels; ditches, and other works of a permanent and singin ground to the north of the Yangtze, along productive character, arguing for this parante un Hwai-ngan. The country prumises equal sport and the prespect of ascertaining more precisely the

effect, if not the cause, of the present inundation, would lend additional interest to the trip. -N. C.
